

# The Vanika Project

## *Empowering Women Artisans Through Technology*

---

A hackathon project built during the Gravity Coding Skillsvarz 1.0 event. Our Team Binary Brains (2 members) reached the 2nd round with this solution dedicated to solving real-world challenges faced by women artisans.

### **Problem Statement**

Women artisans and entrepreneurs who produce food, pottery, and bamboo goods face:

- Limited digital presence and tech accessibility
- Unfair pricing and undervaluation of their work
- Weak consumer-artisan connections
- Inefficient distribution channels
- Lack of peer support and community
- Absence of tailored educational and growth platforms

### **Solution Overview**

The Vanika Project aims to provide a dedicated digital platform that:

- Showcases handcrafted goods
- Connects artisans with conscious consumers
- Empowers women through community and resources
- Educates through future growth-focused modules

## Features

1. Bilingual (English + Hindi)
2. Category-based product display
3. Empowerment and mission-first homepage
4. Custom animations inside icons
5. Mobile-responsive hamburger menu
6. Animated seller timeline onboarding (5 steps)
7. Smooth section transitions
8. Community-driven storytelling
9. Minimalistic, purpose-driven UI
10. Drag and Drop

## Tech Stack

- HTML
- CSS
- JavaScript

### ⚙️ *Set Up Instructions*

---

```
""bash
git clone https://github.com/Sanafr-03/the-vanika-project.git
```

Navigate into the project :  
cd gravity-coding

Open index.html in your browser — No setup needed! ✓  
""

## ## Seller Login Credentials

To access the Seller Page:

- \*\*Phone Number:\*\* 6789123450

- \*\*Password:\*\* VANIKA

 Use the above credentials to log in as a Seller.

## Deployment

Live at: <https://the-vanika-project.netlify.app>
